

MARCH

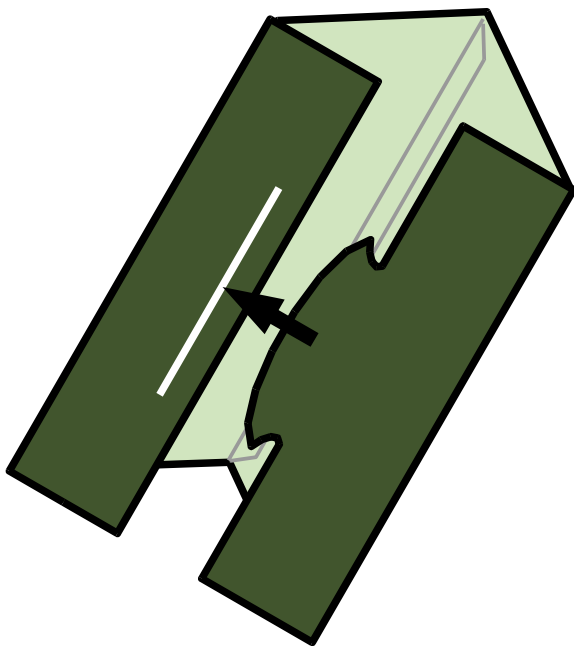

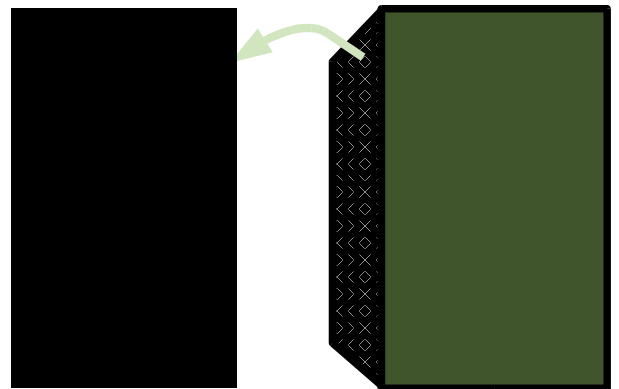

to your own tune

1] To make the calendar, first print out the two following pages of this PDF file. Printing on card paper or anything heavier than standard photocopy paper will give better results.

2] Cut out the two pieces of the calendar along the dotted lines. The cutouts should then be folded along the lines indicated by the red arrows.

3] Glue the upper edge of the two pieces together using the slanted tab provided. (Indicated by the line shaded shape on the right.)

4] Fold into shape, and secure the curved tab at one end into the slot opening at the other end to finish your new calendar.
